PayTrace Payment Gateway

Streamlined payment acceptance

PayTrace is a flexible payment gateway solution designed to meet the needs of a variety of business segments including B2B/B2G, professional offices, subscription services and healthcare.

Online. In Person. On the Go.

Streamline payment acceptance across all channels:

> Robust Virtual Terminal processes transactions in person or via mail/phone order

> Simple API interface and plug-and-play shopping carts speed eCommerce integration

> Convenient Mobile application accepts payments on the go.

Lower Costs

Level II and Level III data capture helps reduce costs by qualifying business, corporate, and purchasing cards at the lowest possible interchange rates.

Gain Peace of Mind

> Built-in fraud tools and data security features like tokenization extend peace of mind for you and your customers.

> EMV processing protects against counterfeit card fraud and eliminates chargebacks related to the liability shift.

Build Business Value

A variety of plug-ins from third-party software providers support business solutions such as invoicing, inventory management, and QuickBooks integration.
